

Hurricane Insurance Protection – Wind Index (HIP-WI) Endorsement General Information

General Information

The Hurricane Insurance Protection-Wind Index (HIP-WI) Endorsement covers a portion of the deductible of the underlying crop insurance policy when the county, or a county adjacent to it, is within the area of sustained hurricane-force winds from a named hurricane based on data published by the National Hurricane Center (NHC) at the National Oceanic and Atmospheric Administration (NOAA). HIP-WI does not provide indemnities for acreage that is prevented from planting or any replanting reimbursement. It is also not available with the Occurrence Loss Option (OLO) or the Comprehensive Tree Value (CTV) Endorsement. The coverage provided by HIP-WI can be combined with other endorsements that provide additional coverage for a portion of the underlying policy deductible, when such coverage does not duplicate the coverage of HIP-WI, including the Supplemental Coverage Option (SCO) and the Stacked Income Protection Plan (STAX), when acreage is also insured by a companion policy. The Endorsement now includes an option for coverage for a tropical storm weather event.

Eligible Crops and Location

When provided in the actuarial documents, the HIP-WI Endorsement provides coverage for over 70 different crops insured under the Common Crop Insurance Policy, Basic Provisions (Basic Provisions) for both Catastrophic (CAT) and additional coverage policies. HIP-WI will be available in counties in the vicinity of the Gulf and Atlantic coasts, as well as Hawaii. The areas of insurance map below show the availability of HIP-WI.

Eligibility Requirements

To be eligible for the HIP-WI Endorsement, you must:

- Have an insurance policy under the Basic Provisions with the same insurance provider (any crop acreage, inventory, or trees and plants that are not insured by the underlying policy are not covered by HIP-WI);
- Elect HIP-WI on or before the HIP-WI sales closing date (SCD);
- Elect a HIP-WI coverage percentage;
- Not have elected the OLO or the CTV Endorsement for the underlying policy; and
- Comply with all terms and conditions of the HIP-WI Endorsement.

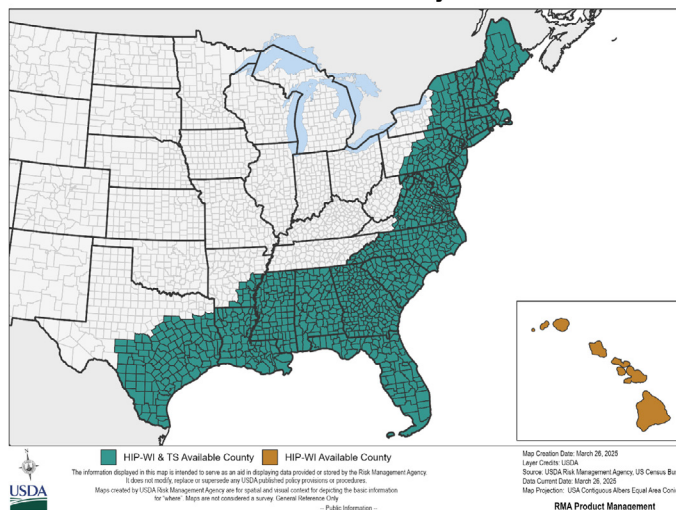

To be eligible for the Tropical Storm (TS) option:

- You must meet all eligibility requirements for HIP-WI;
- You must elect TS on or before the HIP-WI SCD; and
- The TS option must be available in the actuarial documents.

For More Information

Contact your crop insurance agent. If you do not have a crop insurance agent, a list of crop insurance agents is available on the RMA website by using the [RMA Agent Locator](#).

HIP-WI Availability

Insurance Period

Generally, when provided in the HIP-WI actuarial documents the insurance period for HIP-WI begins on the insurance attachment date. When no insurance attachment date is provided on the HIP-WI actuarial documents, the insurance period begins on the later of:

- The SCD of the underlying policy; or
- The earliest planting date, for each planting period when applicable, for the underlying policy.

Generally, the insurance period ends on the:

- End of insurance date, for each planting period when applicable, when provided in the HIP-WI actuarial documents; or
- End of insurance date, for each planting period when applicable, provided in the underlying policy actuarial documents when not provided in the HIP-WI actuarial documents.

If any portion of a tropical storm weather event is within the insurance period, such rainfall will be included determining the County Loss Trigger.

Waiting Period

For the initial year that HIP-WI is elected, coverage will not begin until 14 days after the SCD. If the underlying crop policy also requires a waiting period, the wait periods will run concurrently.

For subsequent years, HIP-WI coverage may be increased (e.g., lowering coverage on the underlying policy, increasing the HIP-WI coverage factor, decreasing the STAX coverage level) by the SCD, but the increased HIP-WI coverage will not take effect until 14 days after the SCD, or the end of the waiting period for the underlying policy, when a waiting period is required by the underlying policy. If a qualifying event triggers the county within the 14-day waiting period, coverage will be based on the coverage percentage and coverage range from the previous insured year.

Acreage Reporting Requirements

Because HIP-WI uses the underlying policy's acreage report, you are not required to submit an additional acreage report for HIP-WI. Unless a qualifying event triggers the county prior to you filing an acreage report, the number of eligible acres will be the number of planted or insured acres reported on an acreage report of the underlying policy. If a qualifying event occurs prior to you filing your acreage report and it is the initial year you elect HIP-WI, your HIP-WI eligible acres will be the lesser of the number of acres reported on an intended acreage report or the number of actual planted acres. If a qualifying event occurs prior to you filing your acreage report and it is any subsequent year after you initially elect HIP-WI, your HIP-WI eligible acres will be the lesser of the number of acres planted at the time of the qualifying event or the highest number of planted insurable acres for the crop in the past four years. For crops which do not require an acreage report, use the crop's equivalent of an acreage report.

If an acreage report must be revised, or the Actual Production History (APH) needs to be corrected, the HIP-WI liability will be held to what the insured initially reported on their underlying policy's acreage report and/or Production Report (APH Record).

Causes of Loss

The full value of the HIP-WI Endorsement is paid if a county, or adjacent county, is within the area of sustained hurricane-force winds

from a named hurricane based on data published by the NHC. Half of the value of the HIP-WI Endorsement is paid when the TS is elected and the county, or adjacent county, is within the area of a tropical storm with sustained surface wind speeds of 34 knots (39 mph) and at least 6 inches of total precipitation received over four days (one day preceding the arrival of the tropical storm, the day of the tropical storm, and two days following the arrival of the tropical storm), according to NOAA and as determined by the Risk Management Agency (RMA), except in the following circumstances:

If a named tropical storm enters your county multiple times, each re-entry will trigger a new four-day period during which rainfall received is counted toward the Final Rainfall Amount. If a new four-day period overlaps another four-day period due to re-entry, rainfall on overlapping days will be counted as occurring simultaneously and will not be double counted. For purposes of determining the Final Rainfall Amount, if a named tropical storm is present in your county for a 24-hour period or more, an additional day will be added to the end of the four-day window for each 24-hour period the named tropical storm is in your county. Additionally, a Final Rainfall Amount of 5.900 inches and above will be rounded to 6 inches.

The counties where payments have been triggered will be identified in the actuarial documents. Individual farm yields and revenues are not considered under HIP-WI, and it is possible that you may experience reduced revenue or reduced yield and not receive an indemnity under HIP-WI. You are not required to file a notice of loss.

Individual farm yields and revenues are not considered under HIP-WI, and it is possible that you may experience reduced revenue or reduced yield and not receive an indemnity under HIP-WI. You are not required to file a notice of loss.

Settlement of a Claim

An indemnity is due when the county loss trigger is identified for the insured county or adjacent county. Only one indemnity payment per insurance period or per planting period, when applicable, per acre is allowed. An indemnity will be due under the TS option if the TS county loss trigger is identified for the county. This indemnity will be 50% of the Hurricane Protection Amount (HPA). When the TS option is elected, up to two indemnities are allowed, but the combined indemnities are not to exceed 100% of the HPA.

Administrative Fees and Premium

An administrative fee and premium for the crop covered by each HIP-WI Endorsement will be due in addition to any administrative fee(s) and/or premium(s) of the underlying policy. The HIP-WI endorsement attaches only to the underlying policy and not to an endorsement. Therefore, only one admin fee is charged for HIP-WI coverage. However, the HIP-WI administrative fee may be waived if you qualify as a limited resource farmer, a Beginning Farmer Rancher (BFR), or a Veteran Farmer Rancher (VFR).

Premium for HIP-WI is calculated by multiplying the HPA by the premium rate and any premium adjustment percentages that may apply. All information needed to calculate the premium rate is contained in the actuarial documents. The premium subsidy for HIP-WI is fixed at 65%.

Important Dates

Sales Closing Date: Sales Closing Date of Underlying Crop Policy

Cancellation Date: Cancellation Date of Underlying Crop Policy
